Response

- The response object

The response object

For each endpoint the terminal object will be returned in its "new state"
Example:

```json
{
    "payment_id": "0155f250633fb11d0b39a4a88f511b19",
    "amount": 1550,
    "reference": "123",
    "terminal_id": "57343e5a0ef5d52813976e3357ef4cdb",
    "sent_via": "sms",
    "sent_to": "+3412345678",
    "status": "created",
    "balance": "0.00",
    "log": {
        "2023-06-12 11:35:22": "created"
    }
}
```

Possible statuses are
• created
• canceled
• paid
• refunded
• partialRefund

Every date and time returned are in UTC.
