

# The response object

For each endpoint the terminal object will be returned in its “new state”

Example:

```
{
  "payment_id": "0155f250633fb11d0b39a4a88f511b19",
  "amount": 1550,
  "reference": "123",
  "terminal_id": "57343e5a0ef5d52813976e3357ef4cdb",
  "sent_via": "sms",
  "sent_to": "+3412345678",
  "status": "created",
  "balance": "0.00",
  "log": {
    "2023-06-12 11:35:22": "created"
  }
}
```

Possible statuses are

- created
- canceled
- paid
- refunded
- partialRefund

Every date and time returned are in UTC.
